SUMMARY

Computer Science Engineer specializing in Data Science, with practical experience in AI/ML, Python, SQL, and intelligent application development. Curious about how technology works, interested in how it can be improved, and always looking for something new to build. My work revolves around data, AI and practical problem-solving.

EDUCATION

A. P. Shah Institute of Technology, Bachelor of Engineering in Computer Science (Data Science)
2022 – 2026 | Thane, India | CGPA: 8.43

EXPERIENCE

Machine Learning Intern, Cognifyz IT Solutions Pvt. Ltd. | Remote | Aug26 – Sep26

- Developing a machine learning-based recommendation system using Python and relevant ML techniques.
- Performing data preprocessing, feature engineering, model development, and evaluation, Working with structured datasets and applying data quality and preprocessing techniques
- Collaborating with team members on project development using Git and GitHub for version control and code management.

TECHNICAL SKILLS

- **Programming:** Python, SQL, R
- **AIML:** Machine Learning, Deep Learning, Gen-AI, LLMs, RAG, NLP, Computer Vision, Model Evaluation
- **Frameworks & Libraries:** Flask, Django, PyTorch, OpenCV, Transformers, Scikit-learn
- **Tools & Platforms:** MS Excel, Git, VS Code, GColab, Jupyter Notebook, Docker, Firebase, Linux
- **Core Concepts:** OOPS, DBMS, Statistics, Data Structures
- **Soft Skills:** Attention to Detail, Communication, Collaboration, Problem Solving, Adaptability

PROJECTS

SafeRide AI-Based Road Safety Intelligence System, Publication: IEEE Xplore 📄

Python, YOLOv8, PyTorch, OpenCV, OCR, Django REST, React.js, MySQL

AI-powered real-time traffic monitoring system using Computer Vision and ANPR with live video streaming to detect traffic violations, identify vehicles and automate offence logging. Integrated e-challan generation and digital notifications, and presented the technical workflow and implementation.

EatFit: AI- Based Smart Product Health Compatibility Checker 📄

Python, Flask, MySQL, API, OpenCV, Scikit-learn, Bootstrap

Built an AI tool that uses OCR to analyze food labels, scores product health, recommends healthier options, and provides personalized diet guidance with admin and cart features.

YouTube Sentiment Analyser and Title Generator 📄

Python, NLP, YouTube API, NLTK, Transformers, Flask, BERT

Designed a web-based NLP tool that analyzes YouTube comments for sentiment, generates optimized video titles, summarizes transcripts, and provides channel statistics.

RetailPro 📄, Python, Tkinter, MySQL, Matplotlib

Built a Python-based retail application with expense tracking, inventory management, realtime transaction updates, and profit-loss visualization for informed decision-making

CERTIFICATES

Cloud Foundations Virtual Internship - AWS Academy | Generative AI Virtual Internship - AICTE-Eduskills |
Data Science Master Virtual Internship - Altair | Certificate Course in Data Analytics (A+ Grade)

CO-CURRICULAR ACTIVITIES

A.P.Shah Institute Of Technology, Social Media Manager (DSA Club)

08/2023 – 04/2024 | Thane,India

Led digital campaigns and coordinated content strategy among a 10-member team.

Interact: Rotary Sponsored Club, Secretary

03/2020 – 05/2021 | Dombivli,India

Organized and managed community service projects with 50+ participants.
